About This Game

Counter Agents is a spy-themed, head-to-head multiplayer game where your objective is to sneak around guards, steal the briefcase, and make it to an exit point before your opponent. Take on the solo-player challenges, compete with your friends in multiplayer mode, and enjoy creating your own maps with the brilliantly simple level editor!

Counter Agents originally started as a student program prototype project during the Fall of 2015 and gradually took shape to what it is today. The original goal was to take an arcade game dating 1983 or earlier and build off of existing mechanics to create something new and unique. The game we were inspired by was 005 (1981), one of the very first stealth games. Of the various 005 game modes, we loved the scenes where you had to avoid policemen with flashlights. We took this idea and created a customizable multiplayer experience with more 3D levels. Keeping the project alive between projects, we have playtested, iterated and polished Counter Agents tirelessly over the past year. Now we're excited to finally bring it to Steam!

Key Features:

- Three game modes include Single Player Challenge, Multiplayer (1-4 players), and Level Editor. The goal of each mode is to find and steal a briefcase and escape, all while avoiding guards, detectives, and other players.
- Top-down view of a 3D environment. There are 3 floors that promote clever level design and strategy.
- Level editor has a simple UI with a drag and drop mechanic so that anyone can create complex designs. Players can post

levels to the online community for anyone to play and rate.

- All original music and audio by our composer, Lance Montgomery.
- Counter Agents will be completely free! No in-game purchases, and no priced DLC. We promise that all updates and bonus content will not have a price.

The solo play levels are tough but you can always try again and succeed

But the MULTIPLAYER is just AWWWWW YEAAAHHHH!. For a free game, this was amusing to play for a little while. The graphics can be difficult to see as everything is more zoomed in or out depending on how large the map is. The only thing you really have to care for is 1) where can you chill, 2) flashlight scopes, and 3) where is the loot. The game is fairly easy, but can get dull in single player mode as you just do the same thing over and over again. It also doesn't even matter if you take forever as things don't really change despite the color scheme changing. The game controls can be a little unforgiving. Using the WASD, I try to stop the character, but the character will continue in the pressed direction for a little bit after the key is released. This frustrated me as it got me caught several times and it is an annoying mechanism.

Overall, amusing game to play as it was free. Not terribly fun for a puzzle platform, but fun if you have some friends to entertain. 6/10. great local play, however occasionally there is unnessecarry lag spikes but overall a good game.
